FULL STACK DEVELOPER

Hi, I'm Fábio, a Fullstack Developer. In the last 2 years, I have mainly worked with the MERN stack in my day-to-day. Building eye-catching and easy-to-use user interfaces is something that I'm really passionate about. Combined with a great interest in developing highly complex systems and scaling them, it makes for a genuine fascination with the entire stack.
I consider myself a tech enthusiast and live by optimism, consistency, and simplicity in both work and life.

TECHNICAL SKILLS

Languages	:	JavaScript, TypeScrict, Kotlin, Java, Python
Frontend	:	React.js, Next.js, Tailwind, React Native, KMM
Backend	:	Express, Node.js
Databases	:	MongoDB, Firestore
Others	:	Jest, AWS, Cognito, Docker, Firebase, Git

EXPERIENCE

Fullstack Developer   November 2021 – Present
Asistobe   *Hybrid – Lisboa, Portugal*

Asistobe is a startup with 3 years of existence. As a Fullstack developer, I have been involved in all stages of creating and developing the web tool for analyzing and optimizing public transport networks since the early stages.
My day-to-day consists of developing frontend functionality in **React** as well as integrating internal APIs with our **Node.js** and **Express** backend. Apart from that, I implemented the authentication process and unit and integration tests in **Jest**.

EDUCATION

Master's degree, Computer Science and Engineering   2019 - 2021
Instituto Superior Técnico

Bachelor's degree, Computer Science and Engineering   2015 - 2019
Instituto Superior Técnico

PROJECTS

Seamless ticketing SDK (Thesis) ⬏

Developed a cross-platform SDK in Kotlin Multiplatform Mobile that provides ticket validation and trip management functionalities for public transportation mobile applications.

Kotlin   KMM   Swift   BLE

Cross Board Talent ⬏

Developed a full-stack web application for Cross Border Talent. This internal web application had the objective of organizing, within a central dashboard, their outsourcing candidates' information and CVs.

JavaScript   Firebase   Firestore   Github

Portofolio ⬏

Website for my personal portfolio, developed with Next.js and Tailwind.

Next.js   Tailwind   Vercel
